ABOUT ME

I'm an entry-level web developer with an Associate's Degree in Programming. I've built and launched Expire, a website that tracks food expirations, along with an anonymous writing website and a custom card creator. These projects demonstrate my ability to build web applications and show my commitment to starting a career in web development.

EDUCATION

2018 - 2023

SCHOOLCRAFT COLLEGE
Livonia, MI

Associate's Degree in Programming

SKILLS

- Angular Framework
- TypeScript
- HTML
- CSS
- Express
- PostgreSQL

TOOLS

- GitHub
- Postman
- Firebase
- Railway

PROJECTS

Portfolio

- Built a portfolio website to display projects and skills.
- Added contact, GitHub, and project details for employers.
- Portfolio: **www.*matthewlandis.dev***.

Expire

- A website for tracking food before it expires.
- Users save items to their own profile.
- Shows which foods are close to expiring or already expired.

Notebook

- A simple website for anonymous writing.
- Users post stories without needing to share their name.
- Added a way to discover random stories from other users.

Yu-Gi-Oh! Card Maker

- A custom card creator for making Yu-Gi-Oh! styled cards.
- Added editing and preview features so users could see changes in real time.
- Users can save their cards and come back to them later.

PROFESSIONAL DEVELOPMENT

- Utilize Codecademy daily to continue learning new languages and reinforce skills.
- Currently studying backend development in depth, with a focus on strengthening C# skills.
